Re:

Permit # 458218 (Existing Location)
Emission Source Reference # 18-0087

Crossville, TN Asphalt Plant (Currently) Moving to McMinnville,

We are currently in the process of moving our Crossville, TN Asphalt Plant (See Attached Current Permit) to McMinnville, TN (Rogers Group Quarry Location)

Our asphalt plant has been out of operation for three years in Crossville, TN due to lack of work and then vandalism to the facility. Our current permit will be the same for the new location with just two requested changes.

We request to change Condition # 16 – Only No.2 Fuel Oil shall be used at this Facility – At this time we intend to use #2 Fuel Oil (Diesel) to heat plant, however we may look at Natural Gas/Propane in the Future.

Also Condition # 17- We need to increase our average basis to 300,000 Tons Per Twelve Month Consecutive Year.

We are moving this plant for a project we were recently awarded through Tennessee Dept of Transportation (Cannon / Warren County Project) It is a 14 Mile Section of Hwy 70 that is to be paved entirely by September 2014. There is Approximately 250,000 Tons of Asphalt on Project.

I'm attaching out existing permit from Crossville, TN location for reference.

Finally – I spoke with Randy Williams on phone after we were awarded project and told him the timeliness that we would need permit. Please let me know what information you need from me so I can assist in a speedy permit.

My Contact is Daniel Odom (931-526-3038 Office) dodom@highwaysinc.com

If you have any questions, need further clarifications, or if I can be of further assistance in this or other areas please let me know.

Sincerely,

Mark A. Odom Highways, Inc. Vice President DIVISION OF AIR POLLUTION CONTROL
